USING APPLE IN THE CLASSROOM?

iPad and other iOS devices are fantastic tools for the classroom!

Not only are they cheaper and more portable than laptops or desktops, but their easy to use interface and the wide range of apps available makes it simple for students and teachers to access a broader range of resources than ever before.

The result?

More independent learning, more engagement from different types of learners, money saved on printing and text books, greater parental engagement and out of hours learning.

But how do you make sure staff are ready for this new technology?

We recommend structured training, delivered by our qualified trainers (ex-teachers themselves!) and tailored to your school's specific requirements.

How do you know which training is right for you?

The workshops in this catalogue are grouped into three sections: Survival, Mastery, and Impact and Innovation. These cover the four stages of Mandinach and Clyne's model for developing confidence and competence when using technology in the classroom, and are all driven by the common themes of creativity and curriculum focus.

You can pick and choose individual workshops, but we've put together some training packages that we think offer schools a cost-effective way to achieve maximum impact at each stage of your iPad journey. Once you've mastered the Survival course content, you can move on to Mastery, and so on, so your staff have a consistent, manageable learning curve for new techniques and skills.

OUR COURSES

Survival

Beginning your iPad journey

The basics of using iPad in the classroom and for productivity.

[Learn more](#)

Classroom workflow with iPad

Finding creative ways to capture evidence for a variety of subjects and key stages.

[Learn more](#)

Assessing with iPad

Learn how to develop activities that support assessment strategy.

[Learn more](#)

Mastery

Coaching, planning and co-delivery

Our trainers can provide one on one support for staff members who are planning and delivering their first lessons with iPad.

Meet our Apple Education Trainers

The charmingly overqualified chaps who deliver our training

Paul

- * Twelve years' experience teaching students, teachers and local authority staff of all technical abilities.
- * An Apple Education Educator, Apple Certified Trainer and Avid Certified Trainer, supporting schools and colleges for ten years.

"Paul was a really good and knowledgeable teacher – he was extremely approachable and very helpful. I learnt an awful lot today – thank you very much."

Pleckgate High School

"Fantastic and engaging speaker... everything was explained in a way where even the most inexperienced user could understand."

West Grove Primary School

Mike

- * Working with Apple technology in the classroom since the mid-90s, in a variety of subjects and across different age groups.
- * An Apple Education Trainer and Apple Certified Trainer, supporting schools and colleges for over 15 years.

"This was an excellent training session, I really hope to transfer what I've learned to the classroom and preparation and assessment!"

St Damian's RC Science College

"Mike Watkinson has visited us twice, both times has been patient and very instructive. Looking forward to his next training day with us."

Sir Francis Hill Primary School

Survival:

Beginning your iPad journey

What does it cover?

iPad is incredibly intuitive and easy to use, making it a powerful and effective learning tool for students of all ages.

This course covers the basics of using iPad, and is designed to help you understand how that functionality can be used to support the curriculum, giving you the chance to explore lesson ideas and activities that will help raise standards.

This is a hands-on workshop, where you will get the chance to explore iPad through a range of apps and practical activities that support all subjects and key stages.

The course is suitable for staff working with any age, and in any learning situation.

What do you need to know beforehand?

This course is suitable for beginners.

Key areas covered:

- * Using iPad hardware and navigation.
- * Using built-in apps.
- * Using iPad to capture evidence.
- * Connecting iPad to displays and interactive whiteboards.
- * Exploring supporting pedagogy.
- * Introducing cross-curricular apps and lesson ideas.

Key stage:

Any

Curriculum focus:

Cross-curricular

Length:

We recommend a session between 1.5 and 3 hours per group of teachers.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Survival:

Classroom workflow with iPad

What does it cover?

This workshop develops the theme of creative evidence capture introduced in 'Beginning your iPad journey'. It aims to allow you to build confidence using apps and workflows appropriate for the curriculum area, age group and situation in which you teach.

You will explore ways to capture evidence of learning and create learning materials.

You will also explore appropriate ways to save and distribute resources, collect student work and support feedback and discussion activities.

What do you need to know beforehand?

This course is an intermediate course, designed to follow 'Beginning your iPad journey'.

Key areas covered:

- * Capturing evidence of learning.
- * Creating and distributing resources.
- * Managing classroom workflow.
- * Collecting student work.
- * Supporting feedback and discussion.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

We recommend a 3 hour session per group of teachers.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Survival:

Assessing with iPad

What does it cover?

This course will allow you to gain experience using iPad to develop activities that support assessment strategy. You'll have the chance to build confidence in using apps and workflows appropriate for the curriculum area, age group and situation in which you teach.

The course aims to show you how to assess digital work and track grades, design engaging quizzes for your students, and support self and peer assessment activities in a technology-rich learning environment. The course is designed to allow you to explore activities that can be adapted to suit different student groups and curriculum areas.

What do you need to know beforehand?

This course is an intermediate course, designed to follow 'Beginning your iPad journey'.

Key areas covered:

- * Exploring apps to support assessment.
- * Assessing pupil progress.
- * Ideas for starter activities.
- * Using iPad for exit ticket activities.
- * Creating assessment workflows using iPad.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

We recommend a 3 hour session per group of teachers.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

**See how iPad
is transforming teaching
and learning at Jesmond
Gardens Primary School**

Mastery:

Coaching, planning and co-delivery of lessons on iPad

What does it cover?

This session is designed to offer class teachers individual support when delivering meaningful lessons with iPad. The format is highly flexible, so that a number of teachers can be supported across a school day, within a schedule based on the existing school timetable. The basic format for each support session will be as follows:

- * Planning - time spent before the lesson reviewing plans for the use of iPad within the context of the scheduled lesson for that class.
- * Delivery - our trainer will give in-class support and guidance while the teacher delivers the lesson.
- * Review - following the session it is important to reflect on what went well and what didn't go so well, to inform developing practice.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of iPad navigation and usage is recommended. It will also prove an advantage to have begun to develop confidence using apps and an awareness of their potential.

Key areas covered:

- * Planning opportunities for using iPad in existing lessons.
- * Supported delivery.
- * Reviewing and reflecting in order to plan next steps.

Key stage:

All

Curriculum focus:

Any

Length:

We recommend a 1.5 hour session per teacher.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Mastery:

Productivity: documents, presentations and spreadsheets on iPad

What does it cover?

Many teaching staff will have already created a large amount of content to support their courses, often in programs like Microsoft Office. However, all of these resources are compatible with iPad.

This course is designed to show you how to utilise these resources on iPad, including transferring existing files to and from iPad, along with importing, editing and exporting files.

The course introduces participants to the incredibly powerful tools on iPad that allow staff and students to create presentations and documents directly on their device, and aims to support and raise attainment across all subject areas.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of iPad navigation and usage is recommended.

Key areas covered:

- * Accessing existing files on iPad.
- * Creating, editing and sharing documents, presentations and spreadsheets on iPad.
- * Working with existing systems (e.g. Office 365, Google).
- * Lesson ideas and activities.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

We recommend a three hour session per group of teachers.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

[**BOOK NOW**](#)

Mastery: iPad in the curriculum

Workshop options:

iPad features a wide range of tools that are perfectly suited to any classroom. This course can be adapted to any curriculum focus, giving participants an opportunity to explore how these functions can enhance student learning in their subject area. These can include English, maths, science, history, geography, languages, PE and sports, art, music and design and technology.

Subjects can also be grouped by faculty where appropriate.

What does it cover?

Participants will explore the resources already available to them on iPad, and will look at the practical application of third party apps. These provide powerful ways to demonstrate learning outcomes and support theoretical understanding, problem solving, and the capture and presentation of evidence.

The workshop will also explore tools for assessment to ensure that staff are able to capture pupil progress and take advantage of the opportunities iPad offers for providing students with rich feedback.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of iPad navigation and usage is recommended.

Key areas covered:

- * Using built-in tools on iPad to support your curriculum area.
- * Third party apps to support the teaching and learning of your subject.
- * Accessing existing curriculum content and support materials.
- * Researching information and presenting evidence with iPad.
- * Assessment and feedback tools.
- * Creating revision materials.
- * Creating electronic portfolios.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation: iPad in the computing curriculum

What does it cover?

This course allows participants to learn skills, explore activities and investigate lesson ideas that will help them deliver the computing curriculum using iPad.

The workshop identifies apps and workflows that promote relevant skills, such as logical thought, creating simple algorithms and developing programs.

Fortunately, due to the intuitive nature of iPad and the design of the apps involved, no previous experience in programming is needed, and the course is suitable for staff with any level of computing experience.

What do you need to know beforehand?

This course can be adapted to suit both beginners and intermediate users of iPad.

Key areas covered:

- * Understanding algorithms.
- * Developing programming concepts.
- * Using programming language.
- * Creating games and apps.
- * Working with flowcharts.
- * Event driven programming.
- * Working with code.

Key stage:

This workshop can be adapted to suit either a primary or secondary audience.

Curriculum focus:

Computing

Length:

We recommend a 3 hour session per group of teachers.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation:

Meeting learners' needs: accessibility and SEND

What does it cover?

This course is designed for educators who want to harness the huge range of built-in technology provided with iPad to support all learners, including those with special educational needs and difficulties, including auditory, visual and motor support.

Through practical, hands-on activities you will explore various features and tools and how they can be matched to the needs of different learners.

Participants will also explore existing resources and content that can be used in the classroom for immediate results, including recommended third party apps and tools.

What do you need to know beforehand?

This course can be adapted to suit both beginners and intermediate users of iPad

Key areas covered:

- * Using the device.
- * Exploring built-in accessibility features.
- * Addressing differing learning styles.
- * Structuring and scaffolding learning.
- * Apps that support learning challenges.

Key stage:

Any

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation:

The paperless classroom: Showbie

What does it cover?

Showbie is one of our most popular solutions for digital classroom 'workflow', and this workshop aims to guide you through its features from both the student and teacher perspective.

You will discover that not only is workflow easy to facilitate with Showbie for iPad, it will also increase opportunities for feedback, discussion and collaboration, not only between students and their teacher, but also between students, teachers, parents and the wider community.

Attendees will build confidence creating paperless classrooms, distributing resources, collecting and marking student work and supporting feedback and discussion activities.

What do you need to know beforehand?

This course can be adapted to suit both beginners and intermediate users of iPad.

Key areas covered:

- * Creating paperless classrooms.
- * Distributing teacher resources.
- * Collecting student work.
- * Creating discussion groups.
- * Giving feedback and supporting peer evaluation.
- * Enabling parental access to portfolios and homework.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation:

The flipped classroom: Explain Everything

What does it cover?

Explain Everything is the most popular interactive screen-casting whiteboard app for iPad, letting you animate, record, annotate, explore and collaborate on ideas, and allowing teachers and students to assess the products and processes of learning.

You will discover why it is a core app for all schools using iPad, both for students to create responses to learning challenges and for teachers to create resources to support a flipped approach to learning.

Attendees will build confidence exploring the huge range of features available in the app to create animated and annotated presentations, collaborate on ideas and build resources for their students.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of iPad navigation and usage is recommended.

Key areas covered:

- * Creating animated presentations.
- * Recording sound and annotations.
- * Collaborating on ideas.
- * Creating resources to support flipped learning.
- * Sharing presentations.
- * Upcycling legacy resources.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation:

Animation and greenscreen techniques for iPad

What does it cover?

Stop-frame animation and greenscreen (or chromakey) are engaging and creative techniques that can be applied in a wide range of curriculum areas, and the end product of these processes integrates extremely well with other key creative processes on iPad.

On this course you will discover how easy it is to get hands-on with these techniques and why they are so popular with learners of all ages. We'll be running through a range of scenarios that can be applied to your classroom.

What do you need to know beforehand?

This course can be adapted to suit both beginners and intermediate users of iPad.

Key areas covered:

- * Using iPad apps to explore movie making tools and techniques for iPad.
- * Using animation apps for iPad to create stop frame animations.
- * Using chromakey apps for iPad to explore greenscreen techniques for iPad.
- * Exploring a range of suitable apps.
- * Planning and sharing lesson ideas using techniques learnt in the workshop.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session. Paid apps may be required.

BOOK NOW

Impact and innovation:

Creating and delivering courses with iTunes U

What does it cover?

iTunes U is a vast repository of courses created by leading institutions around the world, such as Stanford, The Open University and MIT. It's packed full of incredible resources, and the best part is that they are all free!

The iTunes U app for iPad is the perfect way to use these course materials, but it's also really easy to create your own courses and create programmes of study for use by your own students. This course focuses on iTunes U and iTunes U Course Manager, and aims to show you how to create and manage exciting and engaging courses for your students.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of iPad navigation and usage is recommended.

Key areas covered:

- * Exploring existing resources in iTunes U.
- * Setting up a new course.
- * Creating a course structure.
- * Adding materials to your courses.
- * Sharing your course and managing students.

Key stage:

KS3 and above

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation:

Working with interactive displays

What does it cover?

The tech-savvy teacher's classroom display of choice is an interactive touchscreen with built-in software and the ability to mirror the display of any iPad in the room. This workshop aims to bring you up to speed with the opportunities for enhancing learning that these screens can bring to your classroom.

You will run through the basic operation of the display, explore built-in tools and actives, learn how to mirror iPad to the screen and discover why these screens have become so popular with teachers and students alike.

The workshop will be tailored to the confidence level of those attending, and is suitable for schools who have already installed

What do you need to know beforehand?

This course is suitable for beginners.

Key areas covered:

- * Using the display.
- * Bringing the curriculum to life with built-in tools.
- * Using pre-made learning objects - activities and lessons.
- * Capturing and annotating the screen.
- * Mirroring iPad.
- * Collaboration and sharing.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

Schools with displays installed will naturally want to host the workshop in one of their classrooms; a demo screen can be supplied to support the workshop for schools without displays installed.

Some features of the display will require attendees to have access to an activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Impact and innovation:

Working with a VLE

What does it cover?

This workshop is designed to show you how you can utilise your school's virtual learning environment of choice using iPad.

The aim of the workshop is for all attendees to build confidence, exploring the functionality of the VLE to save and access learner evidence, share teacher resources, access student work for assessment purposes, grade and track progress, and facilitate discussion and collaboration between students and others in the school community.

A bit of small print: not all VLEs are the same! The depth into which each topic can be explored depends on the tools for iPad provided by each developer.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of iPad navigation and usage is recommended.

Key areas covered:

- * Exploring the VLE interface.
- * Distributing teacher resources.
- * Collecting student work.
- * Creating discussion groups.
- * Giving feedback and supporting peer evaluation.
- * Enabling parental access to portfolios and homework.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Whole school essentials:

Classroom management for iPad: Apple School Manager and Apple Classroom

What does it cover?

Apple School Manager is Apple's portal for creating Managed Apple IDs for all students and staff, configuring device enrolment settings, and buying and distributing apps, books and learning materials. It works in conjunction with your Mobile Device Management solution, allowing you to prepare your devices for use as shared iPads and allow staff to use the Apple Classroom management tool for teachers.

This session is offered in two sections - the first, held during school time, is for system administrators, network managers and IT support staff, and aims to give an overview of the tools and processes provided by Apple School Manager. The second section, held after school, is a hands-on workshop for classroom-based staff and aims to demonstrate the classroom management tools offered by Apple Classroom.

Shared iPad can be included in the workshop section if required. We strongly encourage you to discuss your specific requirements with your Education Manager and trainer prior to the session.

What do you need to know beforehand?

This course consists of two elements. The section on Apple School Manager is designed for system administrators, network managers, IT support and those with a familiarity with existing systems for managing iPad.

The section on Apple Classroom is designed for classroom-based staff. Basic familiarity with iPad is recommended but not essential.

Key areas covered:

- * Exploring the tools provided by Apple School Manager.
- * Exploring the relationship between Apple School Manager and MDM.
- * Setting up for Shared iPad (if required) and Apple Classroom.
- * Using Apple Classroom as a classroom management tool.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Typically a half-day course to include afternoon and twilight sessions. This course can also be delivered across a whole school day where appropriate.

Maximum number of attendees:

10 for the Apple School Manager session.

Participant requirements:

20 for the Apple Classroom workshop.

Attendee requirements for the Apple School Manager session should be discussed with your trainer or Education Manager. Those attending the Apple Classroom workshop should have access to an iPad that can be managed by Apple Classroom.

BOOK NOW

Whole school essentials:

Planning and vision for leadership

What does it cover?

A successful iOS initiative relies on everyone having a shared vision and a clear plan to achieve it. The aims of the deployment need to be carefully stated, with realistic targets, measurable outcomes and a continuous focus on teaching and learning rather than technology.

In this course, designed for school leadership, you will review the appropriate pedagogy, analyse relevant case studies, review your current plans and create an action plan for your iOS deployment. You will look at ways of presenting plans to a range of stakeholders, including parents, teaching staff and the governing body.

What do you need to know beforehand?

This training is designed for school leadership – basic familiarity with iPad is recommended but not essential.

Key areas covered:

- * Reviewing pedagogy.
- * Evaluating case studies.
- * Adapting existing plans.
- * Preparing for challenges.
- * Planning for success.
- * Presenting your vision.

Key stage:

All

Curriculum focus:

All

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

10

Participant requirements:

An activated iPad with the latest version of iOS installed.

A list of apps you need to have installed will be shared by your trainer prior to the session.

BOOK NOW

Mac training:

Moving from PC to Mac: performing everyday tasks on your Mac

What does it cover?

This course is designed for educators who are making the move from a Windows environment and need to know all the essentials of the Mac operating system. If you've ever asked the question, "how do I do this on the Mac?" then this is the course for you!

This course will guide you through simple operations like finding and accessing files, using the mouse/trackpad and keyboard shortcuts.

Participants will also explore how to import photos and videos, connect to WiFi networks, and use powerful Mac-specific tools such as Dashboard, Spotlight and Launchpad.

What do you need to know beforehand?

This course is suitable for beginners – no previous knowledge of Mac is required.

Key areas covered:

- * Accessing files on a Mac.
- * Mac shortcuts.
- * Using Finder.
- * Gesture controls, the mouse and trackpad.
- * Accessing Microsoft Office files on your Mac.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated Mac (any model that supports the latest version of macOS), with the latest version of macOS installed.

BOOK NOW

Mac training:

Productivity: documents, presentations and spreadsheets on Mac

What does it cover?

This course is designed for educators who are familiar with Microsoft Office and want to find out how to use Apple's word processing, presentation and spreadsheet tools: Pages, Keynote and Numbers.

You will learn how to create beautiful documents using Pages, dynamic multimedia presentations using Keynote, and engaging spreadsheets using Numbers, while retaining a focus on how to integrate these tools into the curriculum.

You will also explore document workflow, and how Office files can be saved from Windows into macOS formats, edited and exported back.

The course can be adapted to focus on any combination of Pages, Keynote and Numbers, as required.

What do you need to know beforehand?

This is a beginners course – no previous knowledge of Mac is required.

Key areas covered:

- * Exploring Pages, Keynote and Numbers.
- * Accessing existing Office files.
- * Importing from and exporting to Windows.
- * Backing up to iCloud.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated Mac (any model that supports the latest version of macOS), with the latest version of macOS installed.

The latest version of Pages, Keynote and Numbers.

[**BOOK NOW**](#)

Mac training:

Creating digital textbooks with iBooks Author

What does it cover?

This course introduces iBooks Author, an intuitive tool that allows you to create your own multitouch textbooks for use on iPad and Mac.

You will explore how to import existing teaching materials in any format, use templates to create new materials and add features such as animations, multimedia elements and review tools for assessment.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of Mac navigation and usage is recommended.

Key areas covered:

- * Exploring iBooks Author features.
- * Importing existing teaching resources.
- * Creating interactive images and galleries.
- * Adding videos and audio (great for narration and 'read aloud' functions).
- * Using review tools to add assessment features.
- * Adding animations.
- * Publishing to iBooks.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated Mac (any model that supports the latest version of macOS), with the latest version of macOS installed.

BOOK NOW

Mac training:

Making movies with Mac

What does it cover?

Movie making is a deservedly popular and established classroom activity. It's an essential component of media courses, but has also found a much wider application in the creative classroom. Having long been the platform of choice for the creative industries, Mac allows you to create professional-looking videos easily, and provides extension opportunities for students who already use iPad for movie making.

This hands-on course focuses on the iMovie application, and will allow you to discover how you can use the Mac to edit, title and transition like a pro.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of Mac navigation and usage is recommended.

Key areas covered:

- * Importing and handling media.
- * Editing clips.
- * Handling titles and transitions.
- * Adding special effects.
- * Using music and sound effects.
- * Export options.
- * Researching and presenting information.
- * Creating a log of student progress.
- * Creating 'how-to' tutorials for students and teachers.
- * Presenting your work.

Key stage:

All

Curriculum focus:

Cross-curricular

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

You'll need to provide:

An activated Mac (any model that supports the latest version of macOS), with the latest version of macOS and iMovie installed.

BOOK NOW

Mac training: Making music with Mac

What does it cover?

Mac computers have always been the first choice for professional musicians whether recording, mixing or composing, and the tools Apple provide are also perfectly suited to the music classroom. Seamless integration with iPad provides great extension and progression opportunities for your students.

This hands-on course, which focuses on the GarageBand application (but can include other applications such as Logic Pro X depending on your requirements), will allow you to discover how you can use the Mac to compose, record and mix like a pro.

What do you need to know beforehand?

This is an intermediate course – a basic knowledge of Mac navigation and usage is recommended.

Key areas covered:

- * Using loops and built-in instruments.
- * Recording and editing MIDI performances.
- * Controlling project parameters.
- * Composing for picture.
- * Recording and editing audio.
- * Mixing your work.
- * Using effects.
- * Export options.

Key stage:

All

Curriculum focus:

Music

Length:

Full or half day, other timings available on request.

Maximum number of attendees:

20

Participant requirements:

An activated Mac (any model that supports the latest version of macOS), with the latest version of macOS and iMovie installed.

The latest versions of GarageBand and Logic Pro X (if required) should also be installed.

What our customers are saying...

Royal Grammar School, High Wycombe

"The most beneficial thing was the opportunity to try a wide variety of apps, with the context explained. [The session] made it very easy to see how this can be used to improve learning. Nice relaxed but very informative setting."

Heath Park, Wolverhampton

"Well worth it – looking forward to the next one!"

Levenshulme High School, Manchester

"Paul was brilliant! He is knowledgeable, completely understanding teaching and learning issues. He always passes on any new information he comes across, which has really helped in the past, he is always willing to provide really helpful advice and follows up any promises of finding out about something – this is why we intend to ask Paul in for further training in the future."

How to book your Apple training

Get in touch with the team for pricing (there are discounts available for bulk bookings, twilight sessions and half days). Talk to us about training packages that are designed to support the requirements of your school.

Sessions can be a full day or half a day, and we can run multiple sessions at once if you want to follow Sidney Stringer's lead and run training on multiple topics at the same time (we have emergency Apple Education Trainers on tap).

How do I book?

All you need to do is give us a call on:
